/ 7% Trans
/ 17% Boys+Men
/ 75% Girls+Women

* State was estimated using area codes, which is approximately 70% accurate based on historical data. All demographic data is based on the voluntary post-conversation survey that approximately 21% of texters complete. Please note that the total percentages in the race, gender, and sexuality charts will not add up to 100% because texters might identify with multiple identities.
